Examiner's Amendment

The application has been amended as follows:

In claim 1, last line, change "volume" to "thickness".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant has amended claim 1 to recite the weight percents of each component of the composition, to specify that at least one of the R groups in the reactive polyorganosiloxane is methacryloxypropyl and to recite "wherein said composition when exposed to UV radiation is capable of a cured-through volume of 15-50 mm". The word "volume" has been changed by examiner's amendment to "thickness" in order to agree with the units "mm" and the disclosure in the instant specification.

Eckberg (4,587,137) and Sato et al (5,447,987) are considered to be the closest prior art. The disclosures of both references are directed to thin films or coatings of the disclosed compositions. There is no teaching that substitution of methacryloxypropyl groups wherein the methacryloxy group is bonded to silicon through a propylene group, as taught by Sato et al, for the alkenyl group directly bonded to silicon, as disclosed by Eckberg, would provide through cure in a thickness from 15-50 mm. The prior art drawn to compositions comprising methacryloyl-functional polyorganosiloxanes and hydrogen-functional siloxanes curable by hydrosilation and by radiation otherwise known to the examiner discloses only thin films and coatings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
